

Shopify Setup Guide

Mana AI Hub — API Token Setup

[mana-shop.ch](#) · [mana-kendra.ch](#)

To connect the AI assistant to your Shopify stores, we need one API token per store. The process takes about 5 minutes per store. Please follow the steps below for Mana Shop first, then repeat for Mana Kendra.

1

Open your Shopify Admin

Go to this website and log in:

<https://admin.shopify.com>

Select your store: Mana Shop

2

Go to Settings

Click Settings in the bottom-left corner of the screen.

Then click: Apps and sales channels

3

Open Developer Tools

Click Develop apps (top-right of the page).

If a warning appears, click Allow custom app development to continue.

4

Create the App

Click the Create an app button.

When asked for a name, type exactly:

Mana AI Hub

Then click Create app.

5

Set Permissions

Click Configure Admin API scopes.

Search for and check these two boxes:

' read_products

' read_orders

Click Save.

6

Install and Copy the Token

Click Install app — then click Install again to confirm.

You will now see Admin API access token.

Click Reveal token once.

& Copy it immediately — Shopify only shows it ONCE!

The token looks like this:

shpat_XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

Send this token to your developer.

Repeat for Mana Kendra

Go back to admin.shopify.com and switch to your Mana Kendra store.

Repeat Steps 2 through 6 exactly.

Send the second token to your developer as well.

What to send your developer:

1. Token for Mana Shop !' shpat_...
2. Token for Mana Kendra !' shpat_...
